*Other accounts receivable* - these amounted to USD 2,255 thousand as at December 31, 2022 compared with USD 3,226 thousand as at December 31, 2021. The decrease in this item is mainly due to IFRS 15 implementation according to which the Company recognized revenues over time (instead of upon delivery) and from increase in advanced payments made to suppliers. *Employee benefits (non-current liabilities)* - amounted to USD 414 thousand as at December 31, 2022 compared with USD 731 thousand as at December 31, 2021. The decrease in this item influenced mostly from the effect of interest rate increase on post-employment defined benefit obligation.

<sup>&</sup>lt;sup>1</sup> See paragraph 1A to 2022 Board of Directors' report - *"The Group"*, an integral part of 2022 Annual Report.

### Outlook

*The COVID-19 crisis* - During year 2022, it seems that most countries over the world conduct their activities side by side to the COVID-19 epidemic and it has no substantial impact on the Group's business activity. China and Hong Kong were the last countries to keep restrictions that were also waived out in December 2022. So in fact all restrictions on transportation within China and outside of China were also fully canceled at the end of 2022.

#### Global business environment changes:

In 2022, instability and uncertainty trends became dominant in the global business environment. A high level of raw materials prices, long lead-time, high logistic cost, high man power costs and pushout of scheduled deliveries up on customer needs were characterizing year 2022. Management believes these trends are not expected to end in the coming year and will continue in 2023, but some of them are in the beginning of a scaling down trend. The Company will continue to follow-up these global trends and update accordingly.

Another factor that affects the Group's activity is the devaluation of the US\$ against the local NIS, the Euro and the Pound, which mainly increases local labor costs and other operating costs in Israel and the United Kingdom. During year 2022 the US\$ devaluation became a more significant factor.

Inflation affects - Since the functional currency of the Group's activity is the US dollar, and since the Group does not use bank loans, management believes there is no material effect of the inflation in Israel and/or worldwide on the Group's business activity, except for some adjustments needed in payroll.

Increase of global interest rate - since the Company does not hold loans, the Group is not expected to have a material negative impact due to the increase in the global interest rate, on the contrary, deposits' income increased.

The Group continues to follow-up and monitors all the above mentioned global developments trying to minimize any impact including maintaining its close contacts with its subcontractors, suppliers and customers, all in order to adjust its operations in the best possible way.

#### Coming year outlook

In 2023 the Group is preparing to cope with the uncertainty and instability of global markets. There are some indicators for a global slowdown, push-out of scheduled deliveries up on customer needs, and great caution needs to be taken with regards to purchases forecast and inventory planning. The raw materials prices are still high and no significant price reduction is expected in coming future. This uncertainty atmosphere requires extra caution in conducting the whole Company's business activity. At this stage, it is not possible to assess the extent of the impact of the trends described above on the Group's activities.

The Group plans to continue investing efforts to improve and efficient its production capacity as well as integration of automation. In addition to its normal course of business the Group will continue its ongoing searching of new markets as well as other business opportunities providing innovative solutions and new technologies as in order to keep expanding its customer base, core business, enlarging its market share and maximize business challenges to the greatest possible extent.

The Group will also continue its ongoing search for business and M&A opportunities, synergetic to its core business, in order to expand its activity.

*Order backlog* - As at December 31, 2022 this backlog amounted to USD 43,839 thousand, and as at March 13, 2023 to USD 44,453 thousand (December 31, 2021 - USD 31,525 thousand). The backlog is composed of the Company and its two fully owned subsidiaries firm orders.
